

Database of Certified Products

04
01/2016

The DGUV Test database of certified products serves as a practical aid in the selection of safe products. Potential buyers can use it to look for products which have a **valid certificate** from one of the testing and certification bodies in DGUV Test. The database provides users with information on more than 15.000 products. By purchasing tested products, companies can rest assured by the fact that these products are unobjectionable in regards to safety requirements.

 Prüf- und Zertifizierungssystem der Deutschen Gesetzlichen Unfallversicherung

Certified products | Index of certified products | Fields of activity

Certified products

The DGUV Test certificates are awarded to safe products which are not harmful to health. This Internet database lists all of the current certificates issued for products and quality management systems by the DGUV Test testing and certification bodies.

Please notice, that in the moment most product terms are in German

(product terms in the Index)

Product designation: saw

 89331 Burgau
 6 certified products

DGUV Test Information

The database is not only a useful application for companies – it also offers market-surveillance bodies and retailers a good way of checking the validity of certificates swiftly and easily.

How it works

The database is very easy to use: The database home page can be found at <http://www.dguv.de/dguv-test/products> (⇒ „Open database“). You can then enter your search term in one of the following categories:

- product designation* (e.g. „sensor“)
- certificate holder (manufacturer)
- product type or
- number of a certificate

There is an „index of certified products“ to help you search for a particular product.

** Please note that at the moment most product terms are available in German only.*

Information provided

The product name, number of certificate and type of certificate (e.g. GS certificate, EC type test certificate) are provided. If the certificate includes data about type or on the intended use and/or other comments, this information will also be provided. To view it, click on the symbol  [More information](#)

Since the manufacturer's address is given for each product, you can easily contact the manufacturer to request additional information or ask where you can buy the product.

Can't find a particular certificate or product?

Since 1965 the testing and certification bodies of DGUV Test have issued well over 95.000 certificates. In order to avoid a muddle of data, we only enter the currently valid test certificates into the database.

If you can't find a product or a company or if you have any other questions, we'll be glad to help out. Just send us an e-mail dguv-test@dguv.de or give us a call.
