Fifth Conference »Safe and Healthy University«

„Vision Zero“: No accidents –
learning and working in health
and safety

18th to 20th September 2017

DGUV Akademie Dresden

Fifth Conference »Safe and Healthy University«

„Vision Zero“: No accidents – learning and working in health and safety

The core aim of the “Vision Zero” strategy is the avoidance of serious accidents – in other words, accidents in which people are killed or suffer life-changing injuries. “Vision Zero” will be the main aspect of the fifth international University Conference. We will examine university-specific issues from this perspective. On the other side the focus will be on questions related to road safety (especially journeys by bicycle) and safe sport at universities.

University - that means teaching and learning, researching and experimenting. People with a wide variety of tasks and activities work under one roof – teachers, students, academic researchers, technical staff and administrators. The subgoal of the Dresden conference series “Safe, Healthy Universities” is to help ensure that all these people can pursue their activities without risk, and that health and safety are recognised as a quality indicator of a university.

How can the university, as a place of work and learning, be designed to be both safe and healthy? Which aspects need to be taken into account? What new research results and current developments are there? Our series sets out to offer a forum in which participants can discuss these and other questions, come to know about and share their own practical experience with others.

The conference targets at everyone who is working at a university or research institute – top researchers, teachers and administrators, OSH-professionals and in-house medical staff, health promotion experts, members of staff committees and works councils, students and prevention specialists from German social accident insurance institutions.

Selected contributions will be interpreted simultaneously into English and German.

1st day · Monday, 18 September 2017

Chairs: members of the Universities and Research Institutes
Division of the German Social Accident Insurance

from 12:00 p.m.	Registration and snacks
1:00 p.m.	Conference opening and introduction of conference theme Dr Christoph Matthias Paridon <i>Institute for Work and Health of the German Social Accident Insurance (IAG)</i>
